

ESTHETIC TECHNIQUE TIPS Innovation...brought to you exclusively by Brasseler USA®

Significantly Improve Your Preparation With Electric

"One of the best benefits of working with an Electric High Speed handpiece like the Forza ELM™ is its ability to finish preparation margins much better than an air driven handpiece. When I am finishing a margin I turn the speed down to 1000 RPM (i.e.: very slow). The incredible concentricity and torque allows much cleaner finish lines than an air driven." ~ Dr. Edward A. McLaren, DDS, MDC, Oral Facial Arts & UCLA School of Dentistry
