Compo-Ject™

Compule Dispensing Gun

► The Challenge

Plastic dispensing guns aren't durable. Most are too big and bulky to fit into your hand correctly, and they are not well enough designed to secure the compule in place. Plastic guns also force the compule tip downward during extrusion, requiring you to adjust your hand and arm angles during material placement.

► The Solution

Compo-Ject is a unique metal compule dispensing gun designed for Evanesce™ and all brands of composite compules.

- Lightweight and durable
- Crafted from high grade, acid-resistant stainless steel
- Easy to load and unload
- Unit-dose tip easily rotates to the desired direction for easy access
- Stylish, sleek, and comfortable to handle
- Sterilizable by any method up to 200 °C/390 °F

Compo-Ject Compule Dispensing Gun

Order No. 160101

IMPORTANT NOTE: Compo-Ject is designed for manufacturer pre-filled compules only.
