

# EDGEPRO™

## Cleaning. Enhanced.

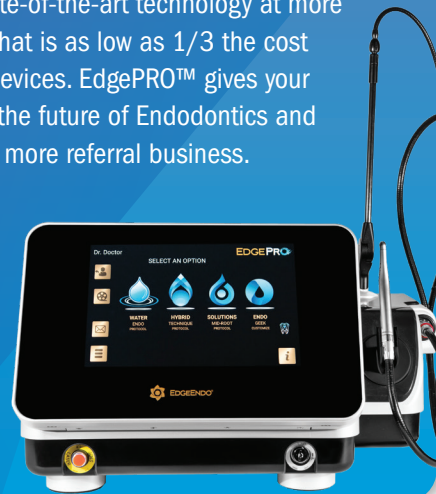

EdgePRO™ provides outstanding Cleaning, Debridement and Disinfection by removing infected tissue, biofilm and smear layer killing up to 99% of bacteria commonly found in the root canals.<sup>(1,2,3,4)</sup> This should give you the confidence you need to treat even the most complex anatomies.

## Endodontics. Streamlined.

EdgePRO™ lets “You be You” – shape and obturate the canals the way you want without the need to change your technique. EdgePRO™ offers the potential for streamlined workflow and one-visit treatment resulting in reduced treatment time and patient visits.

## Technology. Affordable.

EdgePRO™ has state-of-the-art technology at more affordable pricing that is as low as 1/3 the cost of other irrigation devices. EdgePRO™ gives your practice access to the future of Endodontics and an edge in winning more referral business.

**Supreme Clean. Light Speed.**

USA® ENDODONTICS

## Study #1 Courtesy of Dr. Charles Maupin

Maupin Endodontics, Lubbock, TX

- Single visit Retreatment
- Filled internal resorption defect on the palatal root and apical anatomy cleaned and filled.
- "Multi visit case, likely a flare up without the EdgePRO."

## Study #2 Courtesy of Dr. Justin Kolnick

The Endodontic Microsurgery Group &  
Advanced Endodontics of Westchester, White Plains, NY

- Managing the dilacerated (sharply curved) disto-buccal root.
- Managing the curved MB and MB2 canals with separate portals of exit in the mesio-buccal root.
- Dealing with the lateral ramifications in the palatal root.

## EdgePRO™ works using Laser Light Physics, Sound Energy and Microfluidic Dynamics.

EdgePRO™, by delivering and dispersing Laser Light Sound Energy at a specific wavelength and frequency to the irrigants in the canal forms Cavitation Waves throughout the root canal system.

This allows optimal cleaning, debridement, and disinfection of the root canal system up to 99%!(<sup>1</sup>)

## EdgePRO™ is the future. Expensive irrigation systems are the past.

- Easy to use.
- Up to 1/3 the cost.
- No difficult build-ups.
- Decreased treatment time.(<sup>2</sup>)
- Option for one-visit treatment.
- Takes up minimal operatory space.
- Shape and obturate canals how you want.
- Removes infected tissue, biofilm, and smear layer.(<sup>1-4</sup>)
- Outstanding cleaning, debridement, and disinfection.(<sup>1-4</sup>)
- Kills up to 99% of bacteria commonly found in root canals.(<sup>1,2</sup>)

## EdgePRO™ delivers outstanding cleaning, debridement, and disinfection.

Research has shown EdgePRO™ laser technology provides highly effective cleaning, debridement, and kills up to 99% of bacteria commonly found in the root canal.(<sup>1,2</sup>)

## EdgePRO™ now designed with improved features.

- Designed with a quieter fan.
- Includes 2 trunk fibers for convenient maintenance.
- Improved ratchet arm design that locks at 20° and 45°.
- Supported by Endo Specialty Sales team and dedicated clinical specialists for superior quality support.
